

Stanley Xiao

(415) 529-0590 | stanleyxiao00@gmail.com | <https://www.linkedin.com/in/stanleyxiao00>

Education

North Carolina State University

Master of Statistics, GPA 3.75/4.0

2025-2027

University of California San Diego

Bachelor of Arts, Economics; Minor: Cognitive Science

2018-2022

Coursework

Statistical Inference, Applied Statistical Methods, Statistical Programming, Experimental Design

Technical Skills

SAS, SQL, R, Python (Pandas, Seaborn), Tableau, Microsoft Excel

Professional Certifications and Affiliations

SAS Certified Specialist: Base Programming Using SAS 9.4

Mu Sigma Rho (National Statistics Honor Society), Member

American Statistical Association (ASA), Member

Work Experience

Pegasus Shipping Inc.

Los Angeles, CA

Customs Brokerage-Entry Writer

June 2024-Present

- Generated descriptive statistics to monitor fluctuations in entry volumes and analyze historical CBP/FDA hold patterns, identifying key risk patterns to proactively reduce compliance exceptions
- Collaborated with importers, customs agencies, and the FDA to process 40+ weekly entries involving multi-component data and ensuring regulatory compliance across all shipments
- Reduced manual data entry time by 20% by developing Excel macros to automate invoice processing and report generation, improving overall entry accuracy and efficiency

Bioplastics/Cyclertest Inc.

Durham, NC

Business Analyst Intern

August 2023-April 2024

- Cleaned and analyzed 25,000+ invoice records using SQL/Tableau to conduct market trend analysis
- Identified an 80% increase in bioplastics demand over 3 years, attributing growth to COVID-driven biotech production surges to inform inventory and supply chain planning

Project Experience

Storm Trend Analysis (SAS)

- Conducted exploratory data analysis on Atlantic and Pacific storm data using PROC FREQ, PROC MEANS, and PROC SGPLOT to identify seasonal and regional patterns in storm intensity
- Derived variables including wind speed averages, date transformations, and storm basin classifications using DATA step programming and PROC SQL to generate summary statistics across 40+ years of historical storm data
- Conducted one-way ANOVA to test for significant differences in mean wind speed across storm basins, interpreting F-statistics and Type III sum of squares to validate findings

NLP Sentiment Classification Model (Python, NLTK, sklearn, R, ggPlot)

- Built a Naive Bayes sentiment classifier on 1,000+ Yelp restaurant reviews incorporating text preprocessing steps to handle unstructured data
- Achieved 90% classification accuracy via k-fold cross validation and designed a geospatial visualization mapping sentiment scores across cities and neighborhoods
